THE NEW THEORY AGRICULTURE OF MAJESTY KING BHUMIBOL ADULYADEJ

the new theory agriculture

STEP 1 : Primary (Sufficiency Economy)

- efforts to improve the living standards of the rural people
- developed a new theory on land and water management
- based on the division of the agricultural land for household into four part accoring to use in proportion of 30-30-30-10

Section 1 : organized location for reserving water for all activities (30%)

Section 2 : Rice production to main food and reducing out come in household (30%)

Section 3 : Orchard, Vegetable, Agro, or Herbs for food allocating to sell or sharing with neighbor (30%)

Section 4 : Housing, animal farm and one structure(10%)

STEP 2 : Moderatly (Sufficiency and Good Comunity)

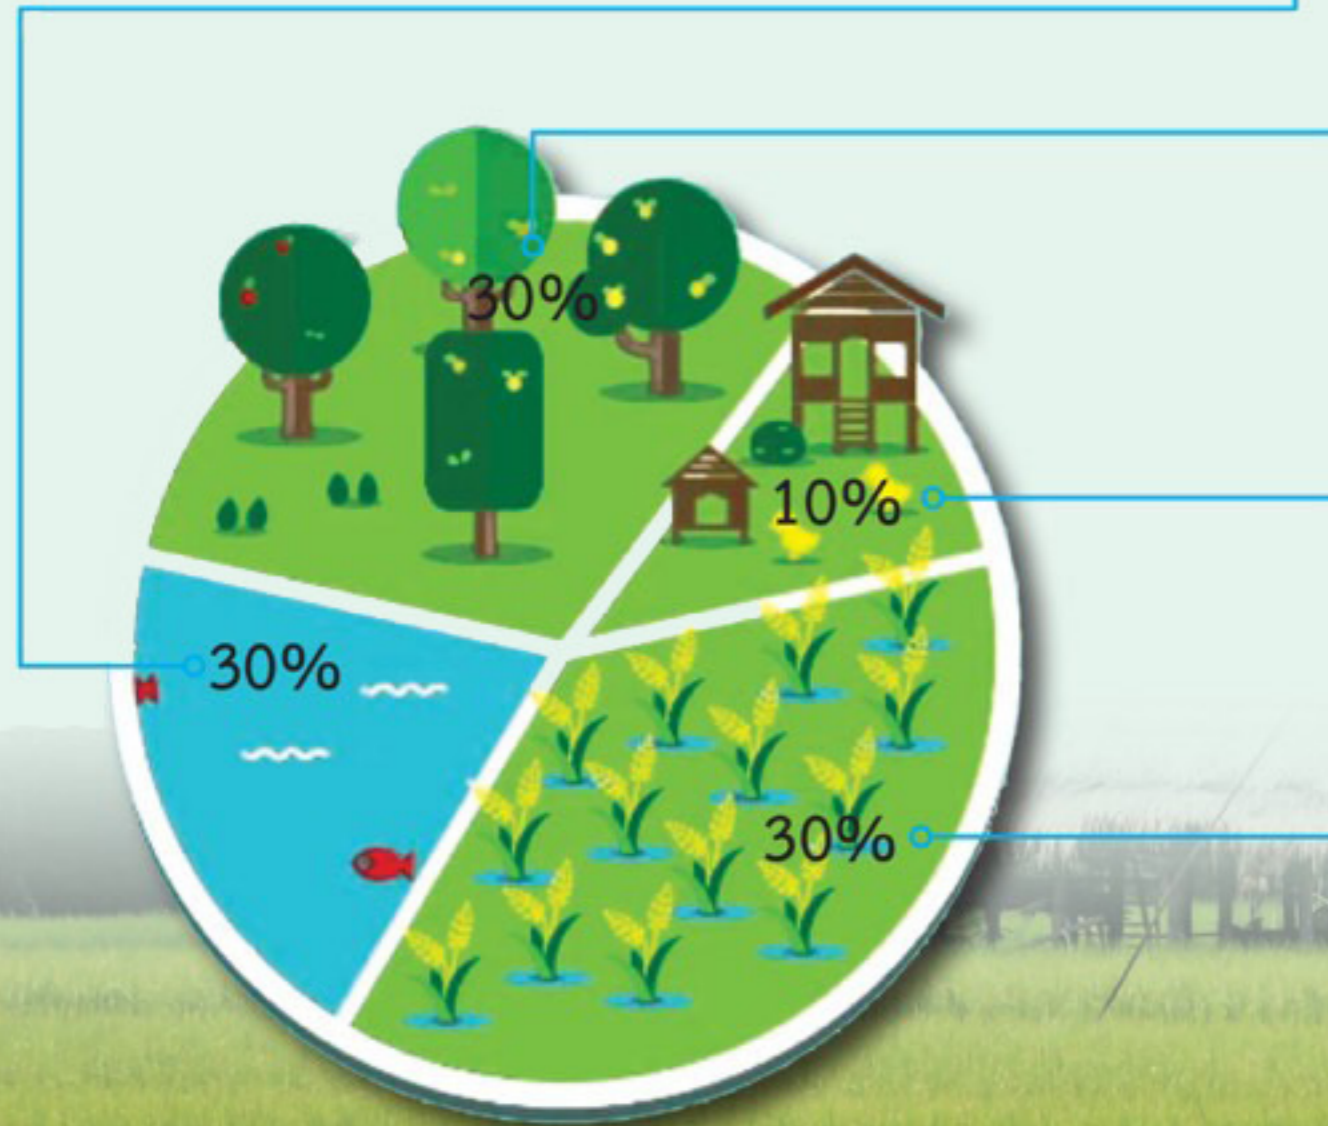

- Good practices and ready to share and organize cooperative action

- 1.Production
 - prepare soil
 - varity, fertilizer and water management
- 2.Marketing
 - prepare for selling in cooperation
- 3.Good comunity
- 4.Benefits of life as public health center and fund
- 5.Education
- 6.Social Developing and support all Religion

STEP 3 : Good progress (Sustainable)

- Sustainable life with Good position and more improving or coordinating with other sites, organize and build up fund

After successfully completing Step 2, farmers will have increased income and make a better living. Thus farmers or farming groups should advance to the third phase which involves coordinating for funding with parties such as banks or private companies to do business, invest, and improve their quality of life.and all parties involved, whether farmers or banks or private companies, stand to benefit.
